

GILL CREEK MUTUAL WATER CO.
PO Box 655
Geyserville, CA 95441

July 15, 2009

You will probably recall that between May and October we have been asked to reduce our water usage by 25 per cent. Based on the recently read meter information your results through June 29 are: reduction

One half of the Water Company customers met or exceeded the goal. There were seven more who came within a point or two of making the goal. There are a variety of reasons which possibly explain missing the 25% reduction goal during this quarter – leaks, guests, more frequent occupancy, etc. We will monitor use during this next quarter and let you know your results.

Directors have indicated there may be a surcharge for those of us who do not meet the goal during the monitor period – May to October.

Sincerely,

Virginia Gill, Manager
